Electric Furnaces - Update

Dear customers,

The new Canadian regulation on fan motor efficiencies for furnaces equipped with a PSC motor will take effect on December 12th, 2019. Installation of some of our electric furnace models will be prohibited outside the province of Québec (**see Table 1**).

To comply with this regulation, we must inform you about the arrival of our new Nortron furnace models (**see Appendix A**). We confirm that these models have the same physical dimensions and characteristics as the previous models. Thus, they can be used to replace old models without having to modify any of the ventilation duct system in place and existing electrical connections. Please note that spare parts from the old models will continue to be sold. For more details on replacement parts, please visit our website (you will find them under the tools tab).

Shall you have any questions, please do not hesitate to contact us at 1 800 463-7043 or talk with your local sales representative.

Regards,
Ouellet Canada
